

BIHAR STATE POLLUTION CONTROL BOARD, PATNA

NOTIFICATION

Notification No. //

Patna, the 03-8- of 2007

In pursuance of the implementation of the provisions under sections 17 and 25/26 of the Water(Prevention and Control of Pollution)Act,1974 AND sections 17 and 21 of the Air(Prevention and Control of Pollution)Act,1981, the Guidelines notified vide this Board's Notification No. 26, dt. the 8th of Nov. 2003 is being amended to the extent as hereunder:

Plastic Industries under sl. no.23 of Annexure VI-- The plastic industries /units should have sophisticated equipments, which operate at an optimum temperature which also record temperature, and other process parameters, ensuring calibration of their equipments periodically. The present distance criterion of 25 meters from the proposed site to habitation shall be sufficient. The nature of products and scale of operations are important, therefore, they should be considered. Based upon such considerations, plastic units should be categorized. Simple operations like sealing, stitching of plastic etc, done manually, should not be considered as main operation for such siting criteria . However, all such criteria with regard to such units may be re-considered after any decision from the State Govt. with regard to their siting is received. Since the matter is under active consideration with the Government, the existing units are being allowed to continue without any distance criterion. The new industries, however, will have to adhere to the siting norms relating to distance and operation.

This amendment Guidelines shall be effective with immediate effect from the date of issue of this notification, but shall be subject to any decision taken by the State Government in this behalf.
